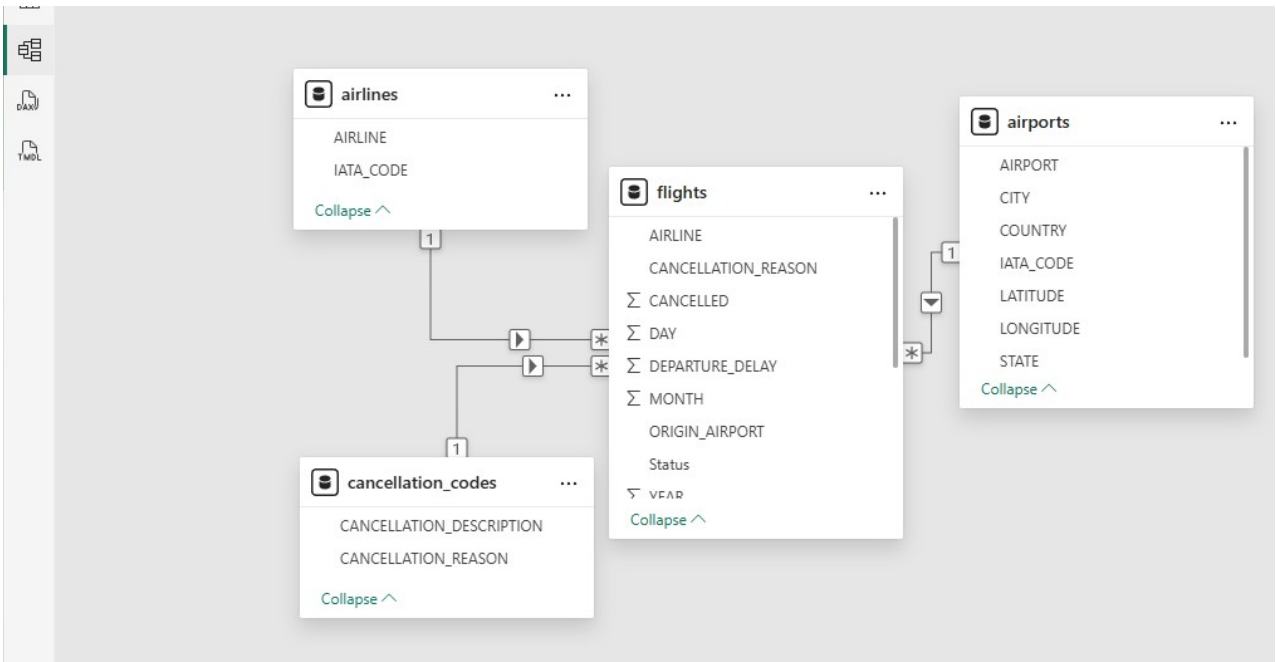
Files and folder

airlines.csv…….Airlines codes and full names
airports.csv…… Airports codes and full names
cancellation_codes.csv……..Cancellation codes and full definition
flights.csv…….. All raw data of US flights in 2015

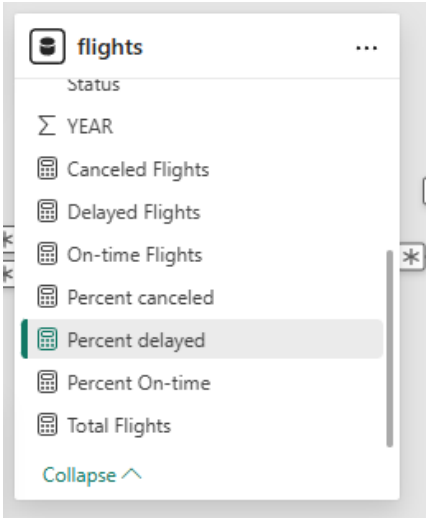
Processes

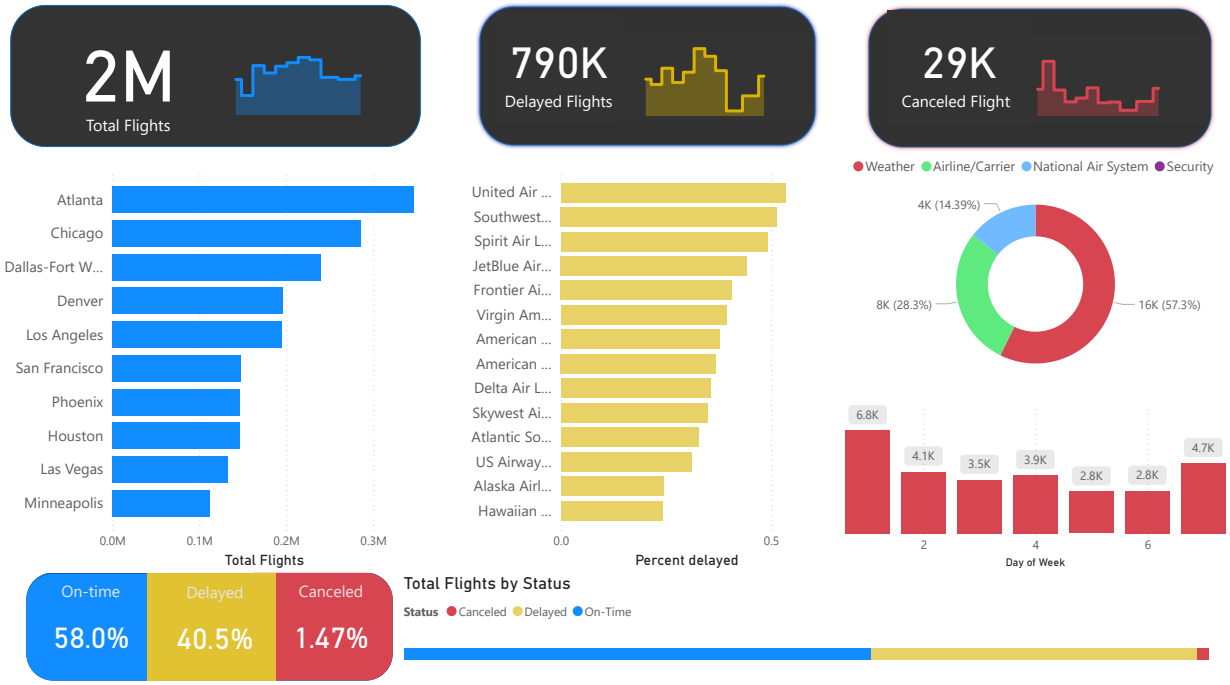
- ## Loaded and transformed data:
  - **airlines.csv:**
    - Use top row as header
  - **airports.csv:**
    - Look good
  - **cancellation_codes.csv:**
    - Use top row as header
  - **flights.csv:**
    - Clean and select data columns relevant to delays
    - Created columns “Status” with Add-column > Conditional column

- ## Build relational model



- ## Add DAX measures
  - Add new measure of Sum and Percentage of Delayed, On-time, and Canceled flights





- ## Visualizing data report
